Management Trainee Opportunities for Undergraduates

Built on the foundational values of sustainability and food security, Bio Foods (Pvt) Ltd is the leading processor and exporter of organic, biodynamic, and Fair-Trade products in Sri Lanka. Operating with the vision of becoming the best environmentally friendly organic food producer in Asia and achieving global customer satisfaction – for 30 years, we have provided our customers with a variety of products ranging from organic tea, spices, herbs, coconut products and frozen food items. Our efforts have excelled us in remitting significant foreign revenue to the country all the while looking after our 1800 employee base and 10,000 farmer families. With multiple awards and recognition in local and international arenas, we have been able to mark our name from markets of European Union to North America to Asia to rest of the world.

Over the years we have been able to produce thousands of paragon industry experts and leaders within the country and overseas. Furthermore, our processors have helped shaped industry standards and benchmarks while acting as knowledge hub for academics and practitioners rooted within and outside the country.

Looking ahead to the future, as an initiative on nurturing our future generations with the knowledge and experiences we have gathered in our thirty years of a journey, we are commencing the management trainee program by early next year. On such efforts, it would be our privilege to partner up with your prestigious university in recruiting fresh minds to our company. Hence, we plan to accommodate dynamic and ambitious academics as management trainees for different scopes in the organization followed with an MOU.

Moreover, we would take this as an opportunity to extend our desire to facilitate career guidance programs and/or job fairs, workshops, seminars, and any other facilitations in the academic process. This will provide the students with an opportunity to work along with highly qualified and trained staff and management and to work with industry experts and market leaders in the organic and fair-trade agriculture export industry.

Hope you will take our suggestion under consideration and looking forward to a positive response in the earliest possible.

Thank You!

Yours Faithfully,

.....
Gayan Wellala
